ABOUT ME

I'm a software engineer with a passion for everything related to the **frontend** and emerging technologies

I really enjoy meeting new people, to talk about technology, both to learn and share knowledge

EDUCATION

Pablo de Olavide University
School of Engineering
09/2017 - 06/2021

Computer science degree in
information systems

LANGUAGES

Spanish (Native)
English (Proficient)

SKILLS

Programming	Javascript, Python
Frontend	React, Redux, Saga, Thunk, HTML & CSS, Antd, etc
Backend	Express, Django
DevOps	Docker & Docker-compose
Others	MongoDB, Mysql, Git, GraphQL, Jest, CI/CD practices, ESLint & Prettier

WORK EXPERIENCE

Software Engineer
DTNº

01/2022 - 07/2022

- Developing and fixing **React** Components
- Refactoring the obtaining of data via **API Rest** and **Redux** and **Saga**
- Configuring **Docker** and Docker-compose files
- Configuring **MongoDB** and **MySQL** databases

CERTIFICATIONS

Full Stack Open
University of Helsinki

Course focused in modern web development with **Javascript**.

In this course I've learnt technologies like **React**, **Redux**, **Node**, **Express**, **Jest**, **Cypress**, **MongoDB**, **GraphQL** and **good practices** in web development

PERSONAL PROJECTS

Information system that manages NBA players states

09/2021 - 12/2021

API Rest created by **Django** that offers players data.

The API is protected by **JWT authorization**. The players' state is updated automatically by Twitter. A **websocket** is used for the Twitter connection. Frontend developed by **React**. Google **Chrome extension** creation that consumes the API via websocket
